Fund manager's commentary

Global equities rose 0.72% in local currencies but only 0.07% in sterling because of the pound's strength. Developed markets outperformed, with equities in the US, Europe excluding the UK and the UK rising 1.72%, 1.48% and 0.26% in sterling. The European Central Bank shifted monetary policy, moving to a 2% average inflation target in line with the Federal Reserve and implying inflation might exceed 2% for some time before monetary policy tightened. Within the EF Brompton Global Balanced Fund, BlackRock European Dynamic and the WisdomTree Europe SmallCap Dividend exchange-traded fund outperformed, up 3.90% and 3.85% respectively. All UK equity holdings outperformed, with Aberforth UK Small Companies doing best, up 3.33%. Equities in Asia excluding Japan and emerging markets lagged, down 8.04% and 7.27% respectively in sterling, led lower by Chinese equities, which fell 14.36% as investors took fright after Beijing banned education companies from making profits. All holdings in these markets were relatively resilient. Matthews Asia ex Japan Dividend did best, down 4.21%, while Hermes Asia ex-Japan did worst, down 6.97%. Global bonds rose 0.68% in sterling. UK government bonds and sterling investment-grade corporate bonds outperformed, returning 2.84% and 1.42% respectively, while sterling high-yield bonds trailed, returning 0.42%. Within the portfolio, Henderson Fixed Interest Monthly Income and the sterling-hedged PIMCO Global Low Duration Real Return holding did best, returning 1.11% and 1.10% respectively, while Royal London Short Duration Global High Yield Bond gained only 0.11%. The EF Brompton Global Balanced Fund gained 0.53%† in July while the sector gained 0.60%.

* excluding cash

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
