Fund manager's commentary

Global equities fell 3.19% in local currencies but rose 0.27% in sterling as a result of foreign exchange swings. Sterling fell 3.45% against the dollar as UK lockdown restrictions tightened and Brexit trade talks seemingly failed to progress. US equities lagged, falling 0.37% in sterling as agreement on a further rescue package eluded politicians. US technology stocks retreated from historically-high levels, ending September down 2.74% in sterling. Among the EF Brompton Global Opportunities Fund's US holdings, Vulcan Value Equity underperformed, falling 3.62%. Morgan Stanley US Advantage, which has a heavy technology weighting, was added to the portfolio. Japanese stocks outperformed, rising 5.43% in sterling as policy continuity seemed assured under Japan's new prime minister, Yoshihide Suga, and lockdown restrictions eased following the country's effective response so far to second-wave Covid-19 infections. T Rowe Price Japanese Equity and Comgest Growth Japan outperformed, rising 9.76% and 8.69% respectively, but Nippon Active Value lagged, up only 2.13%. Equities in Asia excluding Japan and emerging markets also outperformed, rising 2.04% and 1.93% respectively in sterling. Within the portfolio, Matthews Asia ex Japan Dividend did best, rising 4.86%, but JP Morgan Russian Securities underperformed, falling 4.76% as oil prices fell 3.15% in sterling. Global bonds rose 3.20% in sterling as the pound weakened. UK government bonds rose 1.60% while sterling corporate bonds and high-yield bonds rose 0.40% and fell 0.21% respectively. Within the portfolio, Schroder Strategic Credit lagged, falling 0.37%. The EF Brompton Global Opportunities Fund fell 0.48%† in September while the sector fell 0.38%. Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes.

The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts. Investments will not be confined by industrial, economic or geographical sector.

Although the Fund will usually be invested across a range of asset classes, in certain market conditions, the Investment Manager may decide to hold up to 100% in equity markets. This would be for a limited period and only in exceptional circumstances.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
