Fund manager's commentary

Global equities gained 4.17% in sterling as investors became more sanguine about the Ukraine war as the two sides entered ceasefire talks. The Federal Reserve raised interest rates for the first time since 2018, taking them to 0.25%-0.5%, and forecast seven rate hikes in 2022. The Bank of England also hiked rates but its statement was less hawkish. Global bonds fell 1.20% in sterling as investors worried about inflation fuelled by rising energy costs. Within the WAY MA Cautious Portfolio, Schroder Strategic Credit proved resilient, returning 0.25%. Longer-dated bond exposure was increased through an addition to the sterling-hedged Vanguard Global Bond holding as slowing growth may warrant a more defensive position. In the UK, where equities gained 2.05%, Aberforth UK Smaller Companies outperformed, up 5.77%, but Artemis UK Special Situations fell 1.61%. US equities gained 5.69% in sterling but the iShares S&P 500 Financials exchange-traded fund (ETF) rose 1.68%. Vulcan Value Equity was reduced. Yen weakness left Japanese equities up only 0.86% in sterling and Lindsell Train Japanese Equity and Man GLG Japan CoreAlpha did worse, down 3.55% and up 0.63% respectively. Among global equity holdings, the defensively positioned Xtrackers MSCI World Health Care ETF, BGF World Mining and the Xtrackers MSCI World Energy ETF were added while the iShares Edge MSCI World Value ETF was sold. Within the portfolio's alternative allocation, Blackrock European Absolute Alpha gained 2.62% but Man GLG UK Absolute Value fell 0.23%. The WAY MA Cautious Portfolio rose 1.90%† in March while the sector rose 1.52%.

WAY MA Cautious Portfolio (continued)

An OEIC managed by
Brompton Asset Management

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
